The best from 2 systems combined !

Different Products – One Solution:

# Emba-One<sup>®</sup>

German registered design DE 20 2011 109 294

## Different Products – One Solution.

Thanks to Emba One<sup>®</sup>, you can be just as varied as your products themselves. This flexible system is compact and holds your product firmly in position during transit. With this process, Emba One<sup>®</sup> combines the good properties of product cushioning and product fixing.

Emba One<sup>®</sup> can individually adapt to even the **most varied product contours**. Due to the „**suspended delivery**“, there is a very high degree of **protection against shocks and vibrations**.

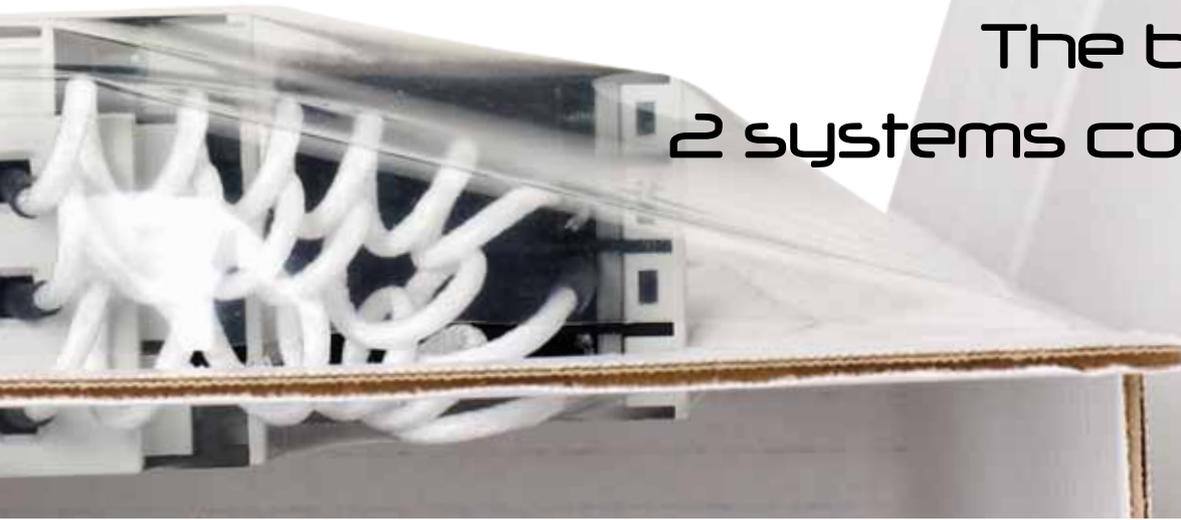

Thanks to the clever construction, **you only need an inner section** (standard systems usually require 2-3 parts). The packaging time is considerably reduced. In the process, flat and also greater product dimensions **can be sent in the same packaging**.

No time-consuming folding as in previous systems is required here. Your product is **quickly and simply packaged** so that it is ready for sending.

Reduce your storage volumes as far fewer packaging sizes are needed.

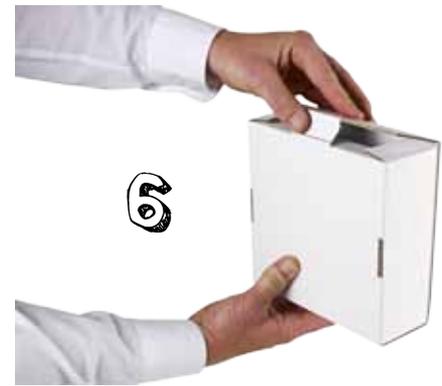

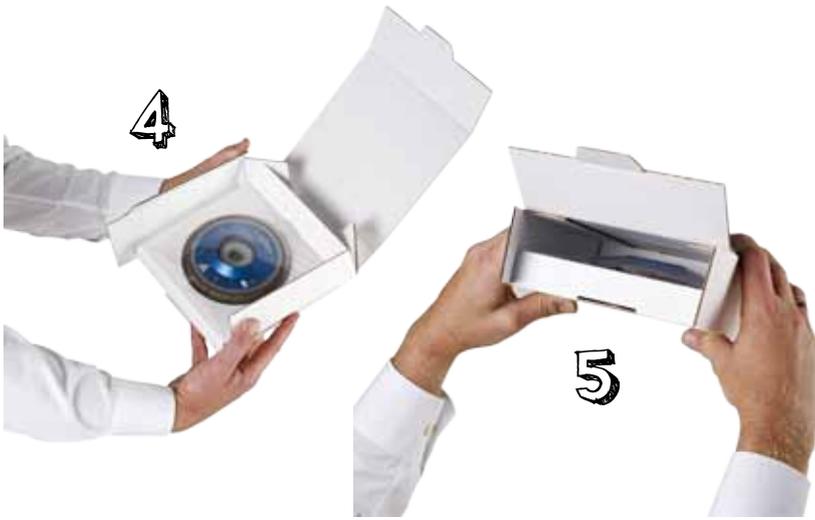

Emba One<sup>®</sup> means that you can benefit from an **environmentally friendly** and **reusable** packaging system and automatically make a contribution to the environment. **The carbon footprint is considerably less** than in the case of standard packaging (e.g. foam). The packaging can be fed unseparated into the waste paper cycle.

# The best from 2 systems combined !

**Version:**

With attached transport box.

## P roperties

- Product cushioning and product fixing at the same time
- Perfectly adapts to various product contours and heights
- Suspended transport
- Only one inner component necessary
- Also with attached transport box possible

## B enefits

- Reduction in the variety of packaging
- Reusable packaging system
- Fast, simple packaging
- Offers high protection against shocks and vibrations

**Version:**

Single insert.

## U ses

- Reduction of labour costs
- Reduction of storage costs
- A solution for lots of products

„Pack faster and more intelligently than  
ever before.“ \*

\* Our packaging can be reused. 😊
