Innovative Protective Packaging ...

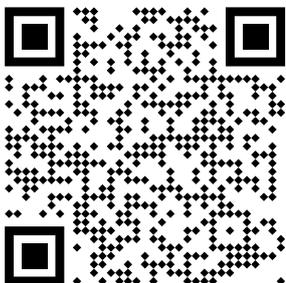

Our company was founded in 2003 as an owner-managed family business. We exclusively focus on innovative solutions for packing delicate products. Our success has proved us right, and during the last few years we became the European market leader for innovative protective packaging.

As your partner, we produce and deliver bespoke protective packaging specially designed for your delicate products. In our headquarters in Bad Oeynhausen, we combine R&D, production and logistics under one roof. With modern machines, lean administration and a highly qualified team, we deliver bespoke packaging solutions tailormade to your needs.

Our standard range, comprising more than 500 sizes, is the market's largest. This standard product range is available from stock – even in small quantities.

Our main catalogue with all standard products can be found on our website:

<https://www.emba-protec.de/service/download/>

For getting to know our entire standard product range, please scan the QR code or ask for our main catalogue "the blue experience" as a printed version (144 pages).

Innovative Protective Packaging ...

With more than 10.000 square meters of storage space and a modern high-bay warehouse with more than 6.500 spaces, we guarantee a just-in-time delivery of your packaging. When you place a contract order, no matter whether the item is a standard size or a packaging specially designed for you, we produce higher volumes, pass-on the price advantage to you and arrange for storage. Up to this point, we bear the cost and you only pay when your packaging leaves our premises. You just have to order call-off quantities and we deliver from stock directly to your production site, always conforming to your changing processes and requirements. This is our understanding of customer service.

We compiled a small part of the standard range in this brochure, suitable for packing IT and electronic devices.

Please do not hesitate to contact us for assistance in choosing the right packaging system for you. We will be pleased to help you. As the European market leader, we have the experience!

for one-way shipping

Maximum product size: **620 x 580 x 160 mm**

Application: **22" - 27"** Monitors
 Max. product weight: up to 10 kg

Television

Your advantages:

- highest protection for large-size flat screens of up to 50 kg
- upright transport of screens
- quick handling – easy packaging process
- no expensive foam packaging or wooden boxes necessary
- reduction of process costs (procurement, storing, shipment)
- environment-friendly, can be disposed of with waste paper
- reusable
- economical due to standard program (no tooling costs)

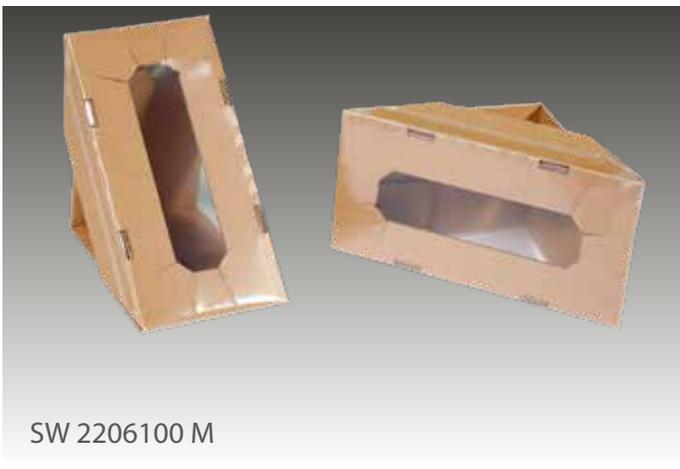

This cushion solution has been designed for large-size flat screens and flat panels with or without a stand. It is tailor-made for 32 to 60-inch diagonal screens. Smaller screen diagonals on request.

The method

Our special packaging for screens is based on the suspension packaging Emba-Swing®. The corner suspension cushions can accommodate different display formats ranging from 32 to 60 inches. This version is especially useful in cases where a stand is pre-installed.

Due to the 4 cushions no stress is applied to any side of the screen. This system allows to pack screens in various dimensions. The outer box will be designed as an individual telescopic packaging.

SW 2206100 M

Product data	
Quality BC 2.30	
Scope of delivery = Suspension cushion 1 unit	

Article-Code	Version
SW 2206100 M	MAXILine 150, PU-film 150 my

For screens up to 60 inches

Applications: plasma and LCD screens, flat panels
Max. product weight: up to 50 kg

Emba-TrayTec Plus

Protective packaging at High - Speed

Emba
TrayTec Plus

Protective packaging
at high speed

Sending sensitive products was previously associated with a lot of effort. Preparing sensitive and high-quality products for dispatch **took time** and **required expensive packaging material**. Emba-Protec has **solved both problems** with the innovative packaging! With the membrane cushion you have achieved **perfect protection** at reasonable cost. Since using and assembling two cushions in larger quantities was time consuming, we combined a membrane cushion with fast automation.

Emba-TrayTec Plus: one cushion and one packaging process in significantly less time.

You benefit from all the advantages of the well-known Emba Swing system and Emba Tray Tec machine system. **You save time, money and thus considerable process costs.**

Prepare the tray ...

Place the product ...

wrap it ... ready for shipping !

Cost:

- 60 % cheaper than competitive foam solutions
- 40 % cheaper than membrane cushions (saving one cushion)
- 90 % less storage space compared to foam solutions
- 50 % time savings in the packaging process

Protection:

- Combines the advantages of two proven packing systems
- Also packs products with difficult contours
- Exceptional protection even for products sensitive to shock and vibration
- Floating transport on a cushion

Speed:

- Faster than ever !

Environment:

- One-material solution (film content less than 5%)
- Hence, the most environmentally friendly packaging
- Disposal in the waste paper
- Replaces all environmentally unfriendly foam packaging!

And please don't be afraid:
the system is very easy to use.
